

**1. Windows XP Activator.**

*A new XP installation but that is not activated*

**Flower**

<http://www.wikihow.com/Activate-Windows-XP-Without-a-Genuine-Product-Key> NOTE Illegal use of software

Open "My Computer" : the drive where your Windows installation is located "Windows" folder:

**Frowns**

Why would someone on I-network still be running Windows XP, let alone a non-licensed one?

**Conclusion/ Remarks**

Have we thought about people running machines that can only use this particular OS?

Open source software like Linux is free of licensing problems, easy to use, of very high quality, handy a

Engage policy formulators to develop strategies (like FOSS) that will not only help the systems manage

---

## 2. User managed SMS platform

---

*One that records customer*

**Conclusion/ Remarks**

**4. Are Uganda's Armed Forces Digitally Compliant?**

*While we have mastered the art of ensuring physical security, the world is currently faced by bigger threats*

**Flowers**

**Frowns**

**Conclusion/ Remarks**

Beef up forensics work in the Uganda Police, counter intelligence efforts as well as thwart any potential

Use of Open Source Software licenses for sensitive software systems hardware to be used on sensitive in

**5. Sugar quoted Adverts "The big wedding"**

Airtel and Warid: A big wedding the will make 7.2M people happy" how is this when about 700++ Ugan

**Flowers**

It will lead to greater industry stability, higher revenue for government. Notand said that 700 people will los

**Frowns**

I still have my DHCP beef with them.

Airtel may be using concepts that work in India work may Example

**Conclusion/ Remarks**

I subscribe to both, I am keeping both; Airtel for data, roaming and clarity of calls, Warid for the vast ne

6.

UCC has launched the Computer Emergency Response Team. (CERT).

**Flowers**

<http://www.ug-cert.ug/>

Phase 1 (of 3) is completed.

Their services are available for everyone, free of charge to limit/prevent cyber crime.

**Frowns**

Shouldn't this be NITA's pushing for such since it has a security dept. for government ?

**Conclusion/ Remarks**

Website requires some modifications.

The CERT launched will focus on the commercial sector. Membership is open to all. The National CERT is operational.

## 7. Smile : Now You Can

### *Launch of 4G LTE Network*

#### **Flowers**

<http://www.smilecoms.com>

Smile 4G coverage map

<http://www.smile.co.ug/~smileugn/pages/availability/smile-coverage.php>

#### **Frowns**

MTN launched LTE some time last month but to really enjoy the speeds one has to be in a certain area

#### **Conclusion/ Remarks**

Does Smile intend to join the UIXP, what are their IPV6 plans? What regional coverage do they have?

Once we have all these LTE networks will they be inter-operable (able to move from one to another?)

Does network extend to Jinja (Ans : Not yet)
