

DSP engineer

Hi I-netters,

I am looking for a DSP engineer preferably with working knowledge of Java, C# or Python to join the WinSenga team. They don't have to be local (they can work remotely for wherever they are).

For those that may not know (don't want to assume here), WinSenga is a smartphone-based solution that allows any midwife/medical personnel to monitor the health of an unborn child around the time of birth (antenatal care and labour) by measuring various heartbeat-related factors and providing suggestions for easy and quick medical decision-making. It also has an inbuilt referral system with an IVR/call centre component.

If you are interested or know someone who may be an ideal candidate, kindly contact me off list.

On joshoke2003@gmail.com

Thanks.

Regards,

Joshua Okello
